

# ALMERICO LIMITED

## 2.0 Environmental Policy

*Almerico Limited* will be responsible for managing the following environmental policy.

Principal environmental issues, which will be continually addressed include:

- 2.1 Preventing or minimising pollution, specifically releases to air and water, and contamination of land. Where pollution events are unavoidable, suitably trained and competent staff will deploy emergency response procedures, which will ensure rapid containment of pollution incidents.
- 2.2 Minimising and managing the effects of noise and vibration from work sites.
- 2.3 Taking account of the presence and sensitivities of natural and heritage features during maintenance operations, and taking into consideration the views of those parties with a legitimate interest in our activities.
- 2.4 Reducing waste generation and reusing or recycling waste materials wherever there are practicable means to do so.
- 2.5 Endeavouring to utilise materials and products, which embody energy and resource efficiency in manufacture and operation, where the material specification meets with the clients requirements.
- 2.6 Complying fully with, and keeping abreast of, all environmental laws, regulations, And environmental good practice.

*Almerico Limited* is committed to raising awareness and influencing our suppliers and sub-contractors to ensure that goods and services procured support our environmental policy.
